Career Objective

Motivated Computer Science undergraduate seeking a Software Engineering internship to apply strong programming fundamentals and hands-on experience in Java, Spring Boot, React, REST APIs, and PostgreSQL. Experienced in building secure, scalable full-stack applications with JWT authentication and database integration, with additional exposure to Artificial Intelligence and Microsoft Azure. Eager to contribute to real-world software projects while continuously developing strong engineering and problem-solving skills.

Education

B.Tech in Computer Science and Engineering 2023 – 2027
N.B.K.R Institute of Science and Technology **CGPA: 8.17/10**

Technical Skills

Languages: Java, Python, C, JavaScript
Web Technologies: HTML, CSS, React, REST APIs
Backend: Spring Boot, Spring Security, JPA/Hibernate
Databases: PostgreSQL, SQL, H2, Pinecone
Cloud: Microsoft Azure, Azure AI Services, Azure Fundamentals
AI/ML: Machine Learning, NLP, LLMs, RAG
Tools: Git, GitHub, VS Code, Eclipse, IntelliJ IDEA
Soft Skills: Communication, Problem-Solving, Teamwork, Collaboration

Experience

Freelance Software Developer – Gully United 2026 – Present

- Developing a full-stack cricket ground booking platform using Java, Spring Boot, React, and PostgreSQL, enabling customers to view slot availability and manage bookings.
- Implementing Razorpay payments, JWT authentication, double-booking prevention, QR-based booking confirmation, Google Maps integration, and an admin dashboard for booking and slot management.

Technologies: Java, Spring Boot, React, TypeScript, PostgreSQL, JPA/Hibernate, Spring Security, JWT, REST APIs, Razorpay, Google Maps

Infosys Springboard Virtual Internship Jan 2026 – Mar 2026

- Developed an AI-based sentiment analysis system using NLP and machine learning techniques, applying preprocessing, feature extraction, and model validation.
- Gained practical experience in developing and evaluating AI solutions for real-world application scenarios.

Projects

KhetConnect – Hyperlocal Agricultural Labour Platform

- Developed a full-stack platform using Spring Boot and React that connects farmers with agricultural labourers based on location, enabling farmers to post jobs and labourers to discover nearby opportunities within a 5 km radius.
- Implemented role-based JWT authentication, REST APIs, job posting and applications, work history, ratings, and location-based job discovery using PostgreSQL.

Technologies: Java, Spring Boot, Spring Security, JWT, React, PostgreSQL, JPA/Hibernate, REST APIs, Tailwind CSS

AI-Powered Market Trend & Consumer Sentiment Forecaster

- Developed an ML-based sentiment analysis system using NLP techniques for consumer sentiment prediction and market trend insights.
- Performed data preprocessing, feature extraction, model evaluation, and explored LLM and RAG integration to improve contextual analysis.

Technologies: Python, Scikit-learn, NLP, LLM, Pandas, NumPy, RAG, Pinecone

Achievements

- Solved 300+ Data Structures and Algorithms problems.
- 1st Place – Cybersecurity Hackathon.
- 2nd Place – Medicare Web Application Competition.
- IEEE Vice Chairperson, NBKRIST.
- Microsoft Learn Student Ambassador.

Certifications

- Microsoft Certified: Azure Fundamentals (AZ-900)
- Kaggle GenAI 2025 Agents Intensive Capstone
